**MILES above our heads, the largest human engineering project is taking place; the building of the International Space Station, our next big move towards the stars.**

It's hit the headlines again with unconfirmed plans to use the Soyuz spacecraft for a free space flight prize sponsored by a soft drink company prepared to cough up the \$20 million flight fee.

Space remains the last stoppung ground for advertisers; there were rumours of a pizza company trying to muscle in on the big beyond some time ago. Brush up on your space stats at this site.

**It won't win any awards for originality but if you've 30 seconds to spare then Monster Bash will release some pent-up PC anger.**

Jump on the monsters

as they emerge from trapdoors sending them back into the void, while watching out for the huge thing with teeth and a long tongue.

Sounds childish? It is, and it's great fun. [www.monsterbats.com](http://www.monsterbats.com)
